

# United 874K Coalition 2010 Advocacy Events

We make up nearly 23% of Kentucky's population!

The 2000 Census data shows 81,136 Kentuckians aged 5-20 years with a disability; 557,971 between the ages of 21-64; and 235,049 over the age of 64. **The total is 874,156!** And this does not include Kentuckians under age 5 or individuals in institutions such as prisons, long term care facilities, etc.

We urge your commitment to address  
the needs of more than  
874,000 Kentuckians with disabilities.
